April 26-27th 2009

AF Ablation Follow-up and Monitoring

Is effectiveness appropriately assessed via a registry?

- The AdvaMed working group recommends the adherence to the HRS/EHRS/ECAS Expert Consensus Statement on Catheter and surgical Ablation of Atrial Fibrillation
- Recurrence rates are a function, in part, of rhythm monitoring regimen. The more monitoring, the higher the recurrence rate.
- Any comparisons of redo rates must take into account rhythm monitoring strategy/regimen used.
- Registry should track but not dictate monitoring procedures
